DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
3. Regarding claim 1, the phrase plate-"like" renders the claim(s) indefinite because the claim(s) include(s) elements not actually disclosed (those encompassed by "like"), thereby rendering the scope of the claim(s) unascertainable. See MPEP § 2173.05(d).
4. Claim 2 recites a negative limitation in lines 2-3, specifically that the elastic member does not include a zigzag spring. The claims should be recited using positive limitations only.
5. Claim 3 recites a negative limitation in lines 1-2, specifically that no zigzag spring or elastic member are disposed. The claims should be recited using positive limitations only.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Ritchie et al. (6,371,456).

8. Ritchie et al. disclose a vehicle seat comprising: a base frame 64 arranged to be attached to a vehicle body 14; a plate-like movable plate 22 (102, 104) mounted to a front bracket of the base frame by a front mounting shaft 72, the movable plate being rotatable such that the rear end of the movable plate rotates vertically about the front mounting shaft; and a cushioning mechanism disposed between the base frame and the movable plate; wherein the cushioning mechanism includes an upper connector 90, 92 connected to the movable plate and a lower connector 60, 62 connected to the base frame; wherein the upper connector and the lower connector are coupled to each other by a viscous material damper 201 and a spring 170, the damper being adapted to apply resistance to relative movement of the upper connector and the lower connector, and the spring being adapted to receive and support a load acting on the lower connector from the upper connector.

Allowable Subject Matter

9. Claim 2-3 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hilary Gutman whose telephone number is 571-272-6662.
